PRELIMINARY AMENDMENT

Dear Sir:

Prior to examination, please amend the above-identified divisional application pursuant to the Revised Amendment Practice, 37 CFR 1.121, effective July 30, 2003.

Each section of the amendment (e.g., amendments to the specification, amendments to the claims, remarks) begins on a separate sheet. Only one version (with markings) of an amended part is provided.

Amendments to the specification are presented by a replacement paragraph or section marked up to show changes made relative to the immediate prior version. Amendments to the drawing figures are made by presenting replacement figures which include the desired changes, without markings. The changes are explained in the accompanying remarks section of the amendment paper. Any amended drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even though only one figure may be amended.

If an amendment adds, changes or deletes any claim, a detailed listing of all claims that are, or were, in the application, irrespective of whether the claim(s) remains under examination in the application, is presented, and the amendment to the claims is expressed in the listing. A status identifier is provided for every claim. All claims being currently amended are submitted with markings to indicate the changes that have been made relative to the immediate prior version of the claims. The changes in any amended claim is shown by strikethrough (for deleted matter) or underlining (for added matter). No separate "clean" version is submitted for currently amended claims. The text of pending claims not being currently amended that are under examination is presented in a clean version in the listing. Any new claim added by amendment is indicated by the appropriate status identifier and is not underlined. The text of cancelled or withdrawn claims is not presented.
